

KINETON GREEN PRIMARY SCHOOL

Infection Control During the Coronavirus (COVID-19) Pandemic Policy

This policy has been produced in line with the current guidance from the UK government and provides detailed infection control considerations for the current Coronavirus Covid-19 pandemic.

Issue Date: December 2020

Review Date: September 2023 or sooner
subject to changes in legislation

Infection Control During the Coronavirus (COVID-19) Pandemic Policy

INTRODUCTION

This policy includes provisions which the school will have due regard for during the coronavirus (COVID-19) pandemic. The information in this policy is under constant review and is updated to reflect changes to government guidance as it is released. This policy will be implemented alongside the Coronavirus (COVID-19): Risk Assessment for Schools and other relevant policies.

LEGAL CONTEXT

This policy has due regard to all relevant legislation and statutory guidance including, but not limited to, the following:

[Early years settings] DfE (2020) 'Actions for early years and childcare providers during the coronavirus outbreak'

DfE (2020) 'Guidance for full opening: schools'

DfE (2020) 'Safe working in education, childcare, and children's social care settings, including the use of personal protective equipment (PPE)'

PHE (2020) 'COVID-19: cleaning in non-healthcare settings outside the home'

DfE (2020) 'Coronavirus (COVID-19): test kits for schools and FE providers'

INFECTION CONTROL MEASURES

The school will conduct a risk assessment to identify sites where infection control may be more challenging, with particular regard to the needs of clinically extremely vulnerable individuals.

The school will ensure strict infection control measures can be put in place to protect clinically extremely vulnerable individuals.

The school will adhere to the government's social distancing guidelines as much as is possible.

All staff and pupils will be:

Told to frequently wash their hands with soap and hot water for at least 20 seconds or use an alcohol-based sanitiser.

Encouraged not to touch their faces.

Told to use a tissue or their elbow to catch coughs and sneezes, and to use bins for tissue waste.

Pupils who have difficulty washing their hands will be supported by a member of staff, with social distancing in place where possible.

The school will promote good respiratory hygiene practices, e.g. the 'catch it, bin it, kill it' approach, throughout the school.

Disposable tissues and lidded bins will be available in every classroom. Hand sanitiser stations will be sited in all classrooms and throughout the school.

Staff are not required to wear face coverings in communal areas of the school, e.g. corridors, where the ability to remain two metres from others can be maintained.

The school will be sensitive and accommodating towards the needs of individuals who are exempt from wearing face coverings, including those who cannot put on or wear a face covering because of a physical or mental illness, impairment or disability, and those who rely on lip-reading, clear sound or facial expressions to communicate.

Sharing food, drink, utensils and equipment will be avoided as much as possible. Frequently touched surfaces will be cleaned and disinfected more often than usual.

Classroom-based resources, e.g. books and games, will be used and shared within bubbles and cleaned regularly; however, individual and very frequently used equipment, such as pencils or pens, will not be shared.

Toys and play equipment will be cleaned on a regular basis. Toys that are "soft", which are hard to clean (such as those with intricate parts) will be taken out of use.

The frequency of cleaning will increase, particularly for outdoor playground equipment and surfaces in classrooms, within toilet blocks and in changing rooms, in accordance with PHE's 'COVID-19: cleaning of non-healthcare settings outside the home.

Equipment and furniture, including tables, chairs, door handles and light switches will be cleaned and disinfected regularly.

PREVENTING THE SPREAD OF INFECTION

Staff, pupils, parents, and visitors will be told not to enter the premises if they are displaying symptoms of coronavirus.

Anyone who is showing symptoms of coronavirus or has tested positive within the last 10 days will be told to self-isolate at home for 10 days from the day where their symptoms first began. If the individual has not had symptoms, but tests positive for coronavirus, they will be told to self-isolate for 10 days from the day they had the test. If they subsequently develop symptoms after having a test, they will be told to self-isolate for 10 days from the day their symptoms began. Anyone displaying symptoms will be encouraged to get tested if they have not done so already.

Anyone who lives with someone with a confirmed case of coronavirus, or coronavirus symptoms, will be told to self-isolate for 14 days from the day the ill individual developed symptoms or had a test. If they subsequently develop symptoms.

Staff will be permitted to keep their mobile phone turned on and on their person to ensure that any alerts to self-isolate can be met with a prompt and appropriate response.

Whilst the school does not recommend that pupils under the age of 16 download the NHS COVID-19 app, Anyone contacted by NHS Test and Trace will self-isolate for the specified amount of time – if an individual is identified as a close contact of an infected person, this is likely to be 14 days.

If a member of staff becomes unwell with the symptoms of coronavirus, they will be sent home and advised to follow PHE's 'Stay at home: guidance for households with possible or confirmed coronavirus (COVID-19) infection'.

If a pupil is awaiting collection, they will be moved to a room where they can be isolated behind a closed door, depending on their age and needs, and receive adult supervision if required. Where possible, a window will be opened for ventilation.

Where isolation is not possible, the pupil will be moved to an area which is at least two metres from anyone else.

If the pupil needs to use the toilet whilst waiting to go home, they will be required to use a separate toilet, where possible. This toilet will be cleaned and disinfected using standard cleaning products before anyone else uses it.

If a member of staff has helped someone who is unwell with coronavirus symptoms, they will not be sent home unless they develop symptoms themselves, the symptomatic person subsequently tests positive, or they have been required to do so by NHS Test and Trace.

Staff will wear PPE, including gloves, a face mask, and an apron, if direct personal care or close contact with an unwell pupil is necessary, and if a two-metre distance apart cannot be maintained. If deemed necessary, eye protection will also be worn.

After removing their PPE, staff will wash their hands thoroughly for at least 20 seconds following any contact with someone who is unwell.

All used PPE will be placed in a refuse bag and be disposed of as normal domestic waste unless the wearer has symptoms of coronavirus.

When cleaning an area where a person with possible or confirmed coronavirus has been, staff will use disposable gloves and an apron. Staff will wash their hands with soap and water for at least 20 seconds after all PPE has been removed.

If there is visible contamination to an area, e.g. with bodily fluids, cleaning staff will use additional PPE to protect their eyes, mouth and nose.

Areas where a symptomatic individual has passed through and spent minimal time, e.g. corridors, but which are not visibly contaminated with bodily fluids, will be cleaned thoroughly with normal cleaning products.

All surfaces that a symptomatic person has come into contact with will be cleaned and disinfected, including objects which are visibly contaminated and those which are potentially contaminated, e.g. door handles.

Disposable cloths or paper rolls and disposable mop heads will be used to clean all hard surfaces, floors, chairs, door handles and sanitary fittings, using one of the following options:

- A household detergent followed by disinfection (1000 ppm av.cl), following the manufacturer's instructions for dilution, application and contact times

- Avoid creating splashes and spray when cleaning.

- Dispose of any cloths and mop heads used by putting them into waste bags.

- Steam clean items that cannot be cleaned using detergents, e.g. upholstered furniture.

- Dispose of items that are heavily contaminated with body fluids and cannot be cleaned by washing.

- Ensure that bins are emptied throughout the day.

Used PPE and waste from possible cases and the cleaning of potentially infected areas will be put into a plastic rubbish bag which will be tied when full. The plastic bag will then be placed into a second tied bin bag, put in a suitable and secure place, and stored for 72 hours or more to reduce the risk to waste disposal workers.

TESTING

To meet our duty to engage with the NHS Test and Trace process, the school will ensure that staff members and parents understand that they must be ready and willing to:

- Book a test if they, or their child, are displaying symptoms of coronavirus.

- If they, or their child, were to test positive or contacted by NHS Test and Trace, provide details of anyone they have been in close contact with.

- Self-isolate if they have been in close contact with someone who develops symptoms of, or tests positive for, coronavirus.

The school has been provided with a small supply of coronavirus home-testing kits which will be distributed to parents of symptomatic pupils and staff members in exceptional circumstances, e.g. if there is reason to believe that they will face barriers to obtaining a test through the usual routes.

The school will not provide tests for asymptomatic pupils or staff, nor will testing take place on-site. Any home-testing kits for pupils will be given directly to their parent to take home;

parents will be made aware that they will be responsible for administering the test at home if their child is under the age of 11.

Where a symptomatic staff member is self-isolating and cannot access testing quickly, the school will consider, on a case-by-case basis, offering home-testing kits to the staff member to ensure they can return to work as quickly as possible. This approach will not be used for pupils.

Parents and staff will be asked to inform the school immediately of any test results. If their test is negative, the staff member or pupil can return to school after self-isolation. If their test is positive, the staff member or pupil will stay in self-isolation and be allowed to return to school only once they do not have symptoms other than a cough, or loss of or change in their sense of smell or taste.

If a staff member or pupil is confirmed to have coronavirus, we will contact the dedicated PHE/NHS advice service through the DfE helpline as soon as possible. We will work with the team of advisors to understand the action we need to take – this may involve receiving help and advice from PHE’s local health protection team (HPT), if escalated. Parents will be informed of any plans in writing.

The school will report all confirmed cases of coronavirus through the DfE’s online attendance form daily return, and inform the LA.

If multiple coronavirus cases are confirmed within the school, PHE will conduct an investigation and advise the appropriate action, which may include a wider group being asked to self-isolate, e.g. a whole year group.

To prepare for the possibility of multiple cases, we will keep a record of all pupils and staff members in each bubble, and any close contact that takes place between pupils and staff within and between bubbles.

LOCAL LOCKDOWNS

If the school’s local area is placed under local lockdown, the school will adhere to the government’s local lockdown guidance.

In the event that the local area moves to a ‘high’ or ‘very high’ local COVID alert level, face coverings will be worn by adults when moving around the premises outside of classrooms, e.g. in corridors and communal areas where social distancing cannot be easily maintained.

The school will communicate arrangements for the use of face coverings quickly and clearly to staff, parents and pupils.

COMMUNICATION WITH PARENTS

The school will inform parents about the measures being taken and request they provide support with implementation, e.g. by encouraging measures to continue at home.

PUPILS WITH SEND

The school will work with the LA and parents to decide how best to continue supporting pupils with EHC plans whilst ensuring they stay healthy and safe.

Some pupils with SEND or complex needs may be unable to follow infection control guidelines. In these circumstances, staff will increase their level of self-protection by minimising close contact (where appropriate), cleaning frequently touched surfaces, and carrying out more frequent handwashing.

MONITORING AND REVIEW

The headteacher is responsible for continually monitoring local advice and updating this policy in line with any changes to government guidance.

Any changes to this policy will be communicated to all staff, parents and relevant stakeholders.
